

## PDF PoC for Research Submission Testing

This file contains two types of PoC payloads:

1) Visible HTML-like payload (useful if the server converts PDF to HTML for preview).

Example payload (as text):

```
"><img src=x onerror=alert(1)>  
<script>alert("stored-xss-from-pdf")</script>
```

2) Embedded PDF JavaScript (will trigger `app.alert` in JS-capable PDF viewers).

If this file is opened in a PDF viewer that supports PDF JavaScript, an alert should appear.
